

Disclaimer for Reboot Clients

#_____

The computer hardware you are receiving is a transaction between the Reboot Club (Reboot McGill, an Engineering Undergraduate Society, EUS, Club; governed by the constitution of the EUS) and you (The Client). McGill University is no longer the owner of the provided material.

All Equipment is sold AS IS without any warranty of any kind, expressed or implied. Reboot is not responsible for the loss of any data due to hardware failure after equipment is delivered. Frequent backups are recommended to avoid data loss.

Upon receiving the computer, it is up to the Client to make sure the hardware is the exact hardware they are requesting.

The operating system included is open-source and free. We install Xubuntu, A Linux-based Operating System, by default, though other Operating Systems are available on request. Xubuntu comes with a number of pre-installed software such as an office suite, a media player and an email client.

Reboot is NOT a technical support service, we do not provide any remote support service. However, Reboot will act in good faith, and if the Client requires any help in operating Xubuntu, or requires some technical help with the computer hardware, they may contact Reboot either by email at reboot@mcgilleus.ca or during office hours as posted on our website (reboot.mcgilleus.ca). If a breakdown of the hardware occurs within 3 months of purchase, Reboot will, with proof of purchase and to the VP Operations' discretion, find replacement hardware.

By receiving this equipment the Client agrees to take responsible steps for its disposal upon the end of its life. Reboot will not be responsible for handling the final disposal of equipment transferred to the Client. There are suggestions on the Reboot website for locations and companies which take old computer equipment for proper equipment.
